

## G-mail Help...

Most e-mail providers have sorting features in them to try and remove junk mail from what is most important to you. Sometimes they think something is junk, when it really is something important like the church newsletter or prayer chain. There is a good chance if you are using gmail that your communications from church have been going to the “promotions tab.” Follow the steps below to get these e-mails into your primary tab.

1. Find an e-mail from church in your promotions tab

2. Click and hold down on the e-mail and drag it to the primary tab.

3. You will see a message in a yellow box appear. Click yes on this box

4. Your e-mails should now come to your primary inbox! You may need to do this for both the prayer chain, newsletter, and youth group messages, but once you do it for each group, you should be all set!
